Summary

- Playing needs **no account** and no personal details.
- **No ads**, no tracking cookies, no advertising profiles, **we never sell data**.
- We only **count anonymously**: page opens, which games are opened and play time.
- Only when you **buy Night Pass** do we store your **email** and order details.
- Leaderboards are **voluntary**; children's games have no name field.
- Most data (progress, parental settings) stays **on your device**.
- You may access, correct or delete your data: write to support@nightplay.vn.

1. Operator and contact details

The Play Hub website (Pop Play, Night Play and Night Pass) is operated by the following party, the controller of personal data ("we"):

Website owner	Phạm Hiệp Tam
Representative	Phạm Hiệp Tam (cá nhân sở hữu website / individual owner)
Address	B2.09.06 Chung cư 4S Linh Đông, Linh Đông, Thủ Đức, Hồ Chí Minh
Phone	0906315080
Personal ID number	Cung cấp cho cơ quan nhà nước có thẩm quyền khi được yêu cầu / Provided to competent state authorities upon request
Ministry of Industry and Trade notification	Đang làm thủ tục thông báo với Bộ Công Thương / Notification with the Ministry of Industry and Trade in progress
Email	support@nightplay.vn
Domain	nightplay.vn

2. Scope and legal basis

This policy covers every page of the website and explains how we handle data in line with Vietnam's Decree 13/2023/ND-CP on personal data protection, the Law on Consumer Protection 2023, the Law on Cybersecurity 2018 and related rules on e-commerce and children's data. By using the website you confirm you have read this policy; for personal data you choose to provide (email when buying, nickname when posting a score), entering and submitting it is your consent for the purposes in section 4.

3. Data we process

3.1. Anonymous play counts

Your browser sends tiny signals to the server (API **/api/t**): a page open (home, Pop Play, Night Play, plan page); the game name and one play when you open a game; every 60 seconds a “still playing” signal (only while the tab is visible); on exit the “playing” record is deleted. The session code is a random string held in page memory and lost when you close the page. Our application **does not store IP address, device or browser type** in this statistics database, uses no cookies and cannot tell who is playing. Counting requests per IP is used only for abuse prevention (3.5).

3.2. Data stored on your device

The browser stores the following locally (localStorage, sessionStorage, IndexedDB). It stays on your device, is sent to the server only where the last column says so, and you can erase it by clearing the site’s data in your browser.

Key	Content	Sent to server?
`theme, lang`	Light/dark theme, language	No
`prefs, usage`	Parental settings (allowed games, daily time limit) and time played today	No
`np-pg-ok, np-pg-lock, np-pg-try`	Parental gate state (passed for 10 minutes, wrong-answer count, retry lock). The birth year typed into the gate is only checked, never stored or sent	No
`np-resume:<game>`	Unfinished round for the “Continue” button (kept up to 7 days, deleted when the round ends)	No
`np-hi-<game> and per-game keys`	High scores, progress, levels, day streaks, chosen skins, trial dates (the intro page only reads these on your device to switch its button to “Continue playing”; it writes and sends nothing)	No
`np-sound, np-haptic, np-multi-hud:<game>`	Sound, vibration and score-panel options for side-by-side play	No
`np_nick`	Nickname you used on the leaderboard (pre-filled next time)	**Yes**: Only when you tap “Share score”
`np_scoreq, np_shares, np_help_<code>`	Unsent score queue, recent “play for me” requests (max 20, kept 7 days) and each request’s owner code	**Yes**: A hash (SHA-256) of the owner code is sent to receive the result
`np-season`	Seasonal events already seen	No
`np-inapp-x, np-welcome-seen`	Dismissed the “Open in browser” hint (1 day); seen the first-visit welcome card	No
`pass (and *-pro-src, *-pro-rc, *-trial)`	If you have Night Pass: plan, expiry date, email and the plan’s access token; cached skin code, trial dates	**Yes**: Token is sent when checking the plan is still valid

Key	Content	Sent to server?
`IndexedDB (device key) and np-up (sessionStorage)`	ECDSA P-256 signing key created on the device to bind Night Pass to it; the private key cannot be exported and never leaves the device	**Yes**: Only the public key and signatures

3.3. When you buy Night Pass

Purchases are made by adults (API **/api/orders**, **/api/webhook/sepay**, **/api/pass**). We store: the **email** you enter (normalised to lower case), a random internal user ID, the plan, amount, method, order code and transfer-content code, creation/expiry/payment times, the plan's expiry, and the device that claimed the plan. Payment is by bank transfer (VietQR). When money arrives, SePay notifies our server; we store the notified transaction (transaction ID, amount, transfer content, receiving account number, matching result and a copy of the notification, up to 4,000 characters). We **neither receive nor store** card numbers, passwords or your banking login. The sender's account name appears in the notification only if your bank puts it in the transfer content.

3.4. Restoring a plan by email (OTP)

APIs **/api/restore** and **/api/restore/verify**: when you restore, we email a 6-digit OTP to the purchase email. It is stored only as a keyed hash (HMAC), valid for **10 minutes**, with at most 5 attempts, and deleted once used. The server always answers the same way so it never reveals which emails bought a plan. On success the email is marked verified and your device is registered.

3.5. Abuse prevention and infrastructure logs

For ordering, restoring, posting scores, play-for-me and purchase-funnel counts, the IP address is used **temporarily** for rate limiting. Some functions store the raw IP, others only a hash that changes daily; records expire after minutes to hours and are used for nothing else. In addition our infrastructure provider (Cloudflare) **processes IP addresses and request details** of every visit to deliver pages and block attacks, under its own policy. Each Night Pass plan keeps at most 3 device public keys with last-use time to stop plan sharing.

3.6. Leaderboard (voluntary)

API **/api/scores**. Only when you tap "Share score" do we store: game name, the **nickname you choose**, score, date (Vietnam time) and whether you hold Night Pass (a badge; the token is not stored). This is **shown publicly**. Do not use your real name or personal details as a nickname. No IP or device ID is stored with it. Children's games have no name field: nicknames are generated from a fixed list (for example "Happy Cat 42").

3.7. Play-for-me and challenges

Play-for-me (API **/api/relay**): the server creates a temporary record with a random ID and a hash of the owner code. The result is **encrypted in the helper's browser** (AES-GCM) with a key placed after the # in the link, which is never sent to the server, so we hold only unreadable data. The record is deleted when you collect the result, or expires within 24 hours. **Challenges**: round details (score, seed and, in some games, a name/avatar you typed) are inside the link you send; we do not store the link. Only send links to people you trust.

3.8. Shared photos, videos and QR codes

Recording video or creating result images happens on your device and is not uploaded. When a payment QR is shown, your browser loads the image directly from img.vietqr.io, so that service can see your IP and the amount and content encoded in the QR. When you share through another app (for example Zalo, Telegram, WhatsApp), that content falls under that app's policy.

3.9. Cookies, fonts and third-party code

The website **sets no cookies** (no tracking or advertising cookies) and embeds no third-party analytics or ad code. Some game pages load **fonts from Google Fonts** (fonts.googleapis.com, fonts.gstatic.com): your browser then connects to Google, which can see your IP address; we pass no other data to Google. Fonts are cached so games work offline.

4. Purposes and legal basis

- **Providing games and features** (saving progress, settings, play-for-me, challenges): performing the service you request; mostly processed on your device.
- **Anonymous statistics** to learn which games are liked and improve the service: our legitimate interest, data not tied to a person.
- **Selling and activating Night Pass**, sending restore codes, reconciling payments, handling complaints and refunds, meeting accounting and tax duties: contract and legal obligation, based on your consent when you enter your email.
- **Leaderboard:** your consent when you tap "Share score".
- **Security, fraud and abuse prevention, blocking unauthorised plan sharing:** legitimate interest and cybersecurity requirements.

We **do not sell** or rent personal data, do not use it for advertising or behavioural profiling, and make no automated decisions with legal effect on you.

5. Children's data

Pop Play is for young children. Children's pages have **no accounts, no ads and do not ask children for personal data**; the counts in 3.1 are anonymous and do not distinguish children from adults; leaderboards use auto-generated fun names only. Parental settings (allowed games, daily time limit, screen lock) live on the device behind a parental gate (a question for adults). Buying Night Pass and changing settings is done by adults. Children under 16 may provide personal data only with the consent of a parent or guardian. If you believe we received a child's data by mistake, contact us and we will delete it within 72 hours of verifying the request.

6. Third parties involved

We use these providers; they process data only for the service:

Provider	Role	Data involved
Cloudflare	Website hosting (Workers/assets), CDN, DNS, Email Routing for the support mailbox	All requests (IP, request headers); mail you send to the support mailbox
Neon	PostgreSQL database	Data in 3.1 and 3.3 to 3.7 (not on-device data)
Resend	Sends OTP emails	Recipient email, OTP message
SePay and banks	Receive transfers, notify transactions	Bank transaction details sent to our server
VietQR (img.vietqr.io)	Generates payment QR images	Browser IP, amount and content in the code
Google Fonts	Serves fonts to game pages	Browser IP when fonts load
Mat Bao	Registrar of the domain nightplay.vn	The owner's domain registration details, no player data

We share data only with the parties above or when a competent state authority requires it by law.

7. Transfers abroad

Cloudflare, Neon, Resend and Google run systems outside Vietnam, so data may be processed abroad. The Neon database is located in AWS Singapore (ap-southeast-1). We transfer only what is needed to operate, require providers to protect data under their terms, and will prepare a cross-border transfer impact assessment where the law requires it.

8. Retention

- **Daily anonymous counts:** kept long-term since they are not tied to anyone.
- **"Playing" records:** deleted on exit, swept after at most 1 day.
- **OTP codes:** 10 minutes, deleted on use.
- **Play-for-me records:** deleted when you collect the result or after at most 24 hours.
- **Rate-limit records (IP or hash):** minutes to hours, swept automatically.
- **Leaderboard scores and nicknames:** until you ask for deletion.
- **Email, orders, transactions, Night Pass records:** kept for at most 10 years from the last transaction (as accounting and tax law requires). You may ask us to delete your email and personal data; records the law obliges us to keep are retained until the legal period ends and used for nothing else. Anonymous statistics are not tied to any identity.
- **On-device data:** under your control; erase it any time.

9. Your rights as a data subject

Under Decree 13/2023/ND-CP you may: (1) be informed about processing; (2) consent or refuse, and withdraw consent; (3) access your data; (4) correct it; (5) request deletion; (6) request restriction of processing; (7) request a copy; (8) object to processing; (9) complain, denounce, sue and claim damages under the law; (10) protect your own rights. Withdrawing consent or deleting order data may cost you the ability to restore a purchased plan and does not affect processing carried out earlier.

10. How to exercise rights and complaints

- Email support@nightplay.vn from the address used for the purchase so we can verify you, stating which right you want to exercise. To remove a leaderboard score, send the game name and nickname.
- We acknowledge within 72 hours and handle deletion and correction requests within 72 hours of completing verification, other requests within 15 days. This is free of charge unless the law allows otherwise.
- We may refuse where the law requires us to keep data or we cannot verify the requester; we will explain why.
- Personal-data complaints: send them to the same address; if you disagree with the outcome you may complain to the competent state authority on personal data protection or sue under Vietnamese law. For payment complaints see the Terms of Use.

11. Security

Data travels over HTTPS. Night Pass tokens are HMAC-signed against forgery and bound to a device key (ECDSA P-256 signatures valid for 120 seconds); OTPs are stored only as hashes; the play-for-me owner code is stored only as a SHA-256 hash and results are end-to-end encrypted; rate limits stop code guessing; the admin area needs a private key, is limited to authorised persons, and secret keys sit in the infrastructure provider's environment variables. No system is perfectly secure; if an incident affects personal data we will respond and notify you and the authorities as required (within 72 hours where the law demands).

12. Payments and refunds

Night Pass is a one-off payment with no auto-renewal. Prices, refund conditions and how complaints are resolved are in the Terms of Use (https://nightplay.vn/terms.html). Payment data is processed as described in 3.3.

13. Changes and governing law

When something important changes we update this page and the effective date at the top. This policy is governed by the laws of Vietnam. Disputes are settled through negotiation and mediation; failing that, before a competent court in Vietnam.

14. Contact

Any question or request about personal data: support@nightplay.vn. Operator: see section 1.

This text is a reference draft, not legal advice. The website owner should have a lawyer or compliance adviser review it before submitting any website registration or notification.
